

Series TRILUB TRD

Three-Screw pump for applications up to 13 bar

Pumped liquid

For handling lubricating liquids without any abrasive components in particular lube oils, hydraulic oils and light fuel oils in all industrial fields of application. The pump liquids may not chemically attack the pump material.

Main fields of application

Oil-fired systems, hydraulic installations, mechanical engineering, general industrial technologies, chemical and petrochemical industries, marine and offshore engineering, lube oil applications

Performance data Series TRILUB TRD

Capacity	Q	up to 11..35	l/min
Inlet pressure	ps	up to 7	bar
Discharge pressure	pd	up to 7	bar
Differential pressure	pdiff	up to 7	bar
Viscosity	v	up to 2..1500	mm ² /s
Fluid temperature	t	up to -20..90	°C
Speed	n	up to 3600	1/min

Construction features

- Bulkhead mounting
- Dry installation
- Horizontal installation
- Self - priming
- With shaft sealing
