Alkyd Primer

PRODUCT DESCRIPTION

A one pack, high build alkyd primer containing anticorrosive pigment.

INTENDED USES

A general purpose conventional primer for application to steelwork above water. Can also be applied over wood and aluminum surfaces.

For use at Newbuilding, Maintenance & Repair or On Board Maintenance.

PRODUCT INFORMATION

Colour CPA234-Red, CPA235-Off White

Finish/Sheen Matt
Part B (Curing Agent) One pack

Volume Solids 58% ±2% (ASTM D2697-86)

Typical Film Thickness 50 microns dry (86 microns wet), 38 - 88 microns dry practical range

equivalent to 65 - 151 microns wet

Theoretical Coverage 11.6 m²/litre at 50 microns dft, allow appropriate loss factors

Method of ApplicationAirless Spray, Brush, Conventional Spray, RollerFlash Point (Typical)Single Pack 37°C (Setaflash) (ASTM D-3278)

Drying Information	5°C	10°C	25°C	35°C
Touch Dry [ASTM D1640 7.5.1]	2 hrs	2 hrs	90 mins	30 mins
Hard Dry [ASTM D1640 7.7]	16 hrs	12 hrs	6 hrs	5 hrs

REGULATORY DATA

VOC

340 g/lt (2.84 lb/US Gal) as supplied (EPA Method 24)

Note: VOC values are typical and are provided for guidance purposes only. These may be subject to variation depending on factors such as differences in colour and normal manufacturing tolerances.

CERTIFICATION

KInternational

- · Fire Resistance Marine Equipment Directive compliant
- Fire Resistance Surface Spread of Flame (Exova Warringtonfire)

When used as part of an approved scheme, this material has the following certification:

Fire Resistance - Smoke & Toxicity (Exova Warringtonfire)

Consult your International Paint representative for details.

SYSTEMS AND COMPATIBILITY

Consult your International Paint representative for the system best suited for the surfaces to be protected.

SURFACE PREPARATIONS

Paint only clean, dry surfaces. Remove all grease, oil, soluble contaminants and other foreign matter by "solvent cleaning" (SSPC-SP1).

Steel:

"Hand Tool Cleaning" (SSPC-SP2) or "Power Tool Cleaning" (SSPC-SP3) of welds, corrosion and damaged shop primer.

Previously Painted Surfaces:

Remove all mill scale, loose rust, loose paint and other foreign matter by "Hand or Power Tool Cleaning" (SSPC-SP2 or SP3, respectively).

Wood and Aluminium:

Consult International Paint.

Apply one or more coats of Interprime 234, as specified.

XInternational

Alkyd Primer

APPLICATION Apply by conventional or airless spray. Application by other methods, brush or roller, may require more than one

coat. Strain material through a minimum 60 mesh screen before application. Apply at 88 microns wet which will yield 50 microns dry film thickness. Consult the following equipment recommendations or utilize suitable equal.

Mixing This material is a one pack coating. Always mix thoroughly with a power agitator before application.

Thinner DO NOT THIN BEYOND YOUR STATE'S COMPLIANCY. Material is supplied at spray viscosity and normally

does not need thinning. If thinning is necessary, thin up to a maximum of 4 ounces/gal. (118 ml) with International

GTA004 Thinner.

Airless Sprav Minimum 28:1 ratio pump; 0.018" - 0.021" (475-533 microns) orifice tip; 3/8" ID high pressure material hose; 60

mesh tip filter

DeVilbiss MBC-510 gun E tip and 704 air cap; 3/8" (9.5 mm) ID material hose; double regulated pressure tank with **Conventional Spray**

oil and moisture separator.

Brush Use appropriate size China bristle brush.

Roller Use All Purpose Roller cover with 3/8" (9.5 mm) smooth to medium nap. Prewash roller cover to remove loose

fibres prior to use.

International GTA004

Work Stoppages and Cleanup Clean all equipment immediately after use with International GTA004. It is good working practice to periodically

flush out spray equipment during the course of the working day. Frequency will depend upon factors such as amount sprayed, temperature and elapsed time including work stoppages. Monitor material condition. All surplus

materials and empty containers should be disposed of in accordance with appropriate regional

regulations/legislation.

In the event welding or flame cutting is performed on metal coated with this product, dust and fumes will be Welding

emitted which will require the use of appropriate personal protective equipment and adequate local exhaust ventilation. In North America do so in accordance with instruction in ANSI/ASC Z49.1 "Safety in Welding and

SAFETY All work involving the application and use of this product should be performed in compliance with all

relevant national Health, Safety & Environmental standards and regulations.

Prior to use, obtain, consult and follow the Material Safety Data Sheet for this product concerning health and safety information. Read and follow all precautionary notices on the Material Safety Data Sheet and container labels. If you do not fully understand these warnings and instructions or if you can not strictly comply with them, do not use this product. Proper ventilation and protective measures must be provided during application and drying to keep solvent vapour concentrations within safe limits and to protect against toxic or oxygen deficient hazards. Take precautions to avoid skin and eye contact (ie. gloves, goggles, face masks, barrier creams etc.) Actual safety measures are dependant on application methods

and work environment. **EMERGENCY CONTACT NUMBERS:**

LIMITATIONS

Apply in good weather. Curing will be delayed if air and surface temperatures are below 5°C. Unmixed material (in closed containers) should be maintained in protected storage between 4-38°C. Overcoating information is given for guidance only and is subject to regional variation depending upon local climate and environmental conditions. Consult your local International Paint representative for specific recommendations. Technical and application data herein is for the purpose of establishing a general guideline of the coating and proper coating application guidelines. Test performance results were obtained in a controlled laboratory environment and International Paint makes no claim that the exhibited published test results, or any other tests, accurately represent results actually found in all field environments. As application, environmental and design factors can vary significantly, due care should be exercised in the selection, verification of performance and use of the coating. In the overcoating data section 'ext' = extended overcoating period. Please refer to our Marine Painting Guide -Definitions and Abbreviations available on our website.

UNIT SIZE	Unit Size	Part A Vol Pack		
	5 US gal	5 US gal 5 US gal		
	1 US gal	1 US gal 1 US gal
